

MtronPTI, a leading provider of Precision Frequency Control Solutions, is proud to announce a comprehensive suite of solutions designed to meet the evolving demands of Electronic Warfare (EW) applications. Leveraging decades of expertise, MtronPTI continues to push the boundaries of technology to deliver state-of-the-art solutions that enhance performance, reliability, and precision.

Key Features and Benefits:

- Ultra-Low Phase Noise: Ensuring clear and accurate signal timing in complex electronic warfare scenarios.
- High Stability: With exceptional frequency stability, these products contribute to the seamless operation of EW systems, even in challenging and dynamic conditions.
- Ruggedized Design: Built to withstand harsh environmental conditions, ruggedized build ensures reliability in the field.
- Flexible Configurations: Allowing integration into a wide range of electronic warfare platforms and systems.

Product portfolio:

- Electronically Vibration Compensated OCXOs – Available frequencies: 10 MHz, 100 MHz, and 166.667 MHz.
- High-frequency OCXOs up to 2.0 GHz - Frequency multiplication integrated with internal OCXO, saves board space
- Dual output PLL OCXO - Single packaged solution with dual OCXOs and PLL integration
- High-performance TCXOs and XOs up to 1.4 GHz
- Precision resonators up to 200 MHz

Industry leading 5E-12 G-sensitivity in smallest volume package

About MtronPTI: MtronPTI is a global leader in providing Precision Frequency Control Solutions for mission-critical applications. The company is dedicated to pushing the boundaries of technology to meet the evolving needs of the avionics, space, defense and aerospace industries.

MtronPTI is an AS9100D and ISO 9001:2015 organization
